

## ► I Technical Description

<b>1. General description</b>	<b>34</b>
<b>2. Design, Functions, Features</b>	<b>35</b>
2.1 Design and functions	
2.2 Preloading	
2.3 Matching of the shaft and ball diameters	
2.4 Coefficient of friction $\mu$	
<b>3. Notes on Design and Installation</b>	<b>37</b>
3.1 Important notes on design	
3.2 Mounting the guide bush	
3.3 Mounting the guide shaft	
3.4 Installing the ball cage	
3.5 Special designs	
<b>4. Maintenance and Service Life</b>	<b>41</b>
4.1 Lubrication	
4.2 Dry running	
4.3 Wear	
4.4 Regularity of maintenance checks	
4.5 Service life	
<b>5. Computation of the Rotary Stroke Bearing</b>	<b>42</b>
5.1 Stroke path and contact lengths	
5.2 Loading capacity with radial load	
5.3 Specific rated load $C_{10}$	
5.4 Permissible acceleration in the case of linear movement	
5.5 Permissible rotary speeds for the ball cage	
<b>6. Annex</b>	<b>49</b>
6.1 Abbreviations	
6.2 International units of measurements and material designations
